3. **Server Reliability:** Discord servers can be subject to server owner discretion, changes in rules, or even shutdowns by Discord itself for violating terms of service.

## Ethical Considerations

1. **Consent and Respect:** Servers should prioritize consent and respect among members. Discussions and interactions should be consensual and respectful of others' boundaries.
2. **Age Verification:** Ensuring that all users accessing NSFW content are of legal age is crucial to comply with legal requirements and maintain a safe environment.
